

**IWFF** was the first ever  
juried wildlife film competition  
in 1977.

**Reptiles. Birds. Fish. Invertebrates.**

Some of our most vulnerable species are  
not just the **grizzly bear** or the **rhino**.

We have undeniably shifted into a world  
where half of species today may become  
extinct within the next 75 years.

**How would this  
change to a smaller  
world affect you?**

“We want this to be the children’s  
film festival, we want to be the  
first-putter’s film festival, we want to  
be the down-home film festival, we  
want to be the scientifically accurate  
film festival.”

**- IWFF Founder, Chuck Jonkel**
